

President Donald Trump Legal Team Press Conference  
Regarding Evidence of Election Fraud

Statements by Rudy Giuliani, Sidney Powell, and Jenna  
Ellis

November 19, 2020

1 **RUDY GIULIANI:** Good afternoon and thank you very much  
2 for coming. This is representative of our legal team.  
3 We're representing Trump and we're representing the  
4 Trump campaign. When I finish, Sidney Powell and then  
5 Jenna Ellis will follow me and we will present, in  
6 brief, the evidence that we've collected over the  
7 last -- I guess it is two weeks. Also, Joseph DiGenova  
8 and Victoria Toensing are here with me. There are a lot  
9 more lawyers working on this, but I guess we're the  
10 senior lawyers, and Boris Epshteyn.

11 So, I guess the best way to describe this is when  
12 we began our representation of the President, we  
13 certainly were confirmed with a very anomalous set of  
14 results with the President way ahead on election night,  
15 700,000 or 800,000 in Pennsylvania. Somehow, we lost  
16 Pennsylvania. We have statisticians willing to testify  
17 that that's almost statistically impossible to have  
18 happened in the period of time that it happened. But,  
19 of course, that's just speculation. As we started  
20 investigating, both our investigations and the very  
21 patriotic and brave American citizens that have come  
22 forward are extraordinary. An extraordinary number of  
23 people -- extraordinary number of witnesses. And what  
24 emerged very quickly is -- is it's not a singular voter  
25 fraud in one state. This pattern repeats itself in a

1 number of states -- almost exactly the same pattern  
2 which, to any experienced investigator or prosecutor  
3 would suggest that there was a plan from a centralized  
4 place to execute these various acts of the voter fraud,  
5 specifically focused on big cities and specifically  
6 focused on -- as you would imagine -- big cities  
7 controlled by Democrats, and specifically focused on  
8 big cities that have a long history of corruption.

9       The number of voter fraud causes in Philadelphia  
10 could fill a library. Just a few weeks ago there was a  
11 conviction for voter fraud and one two weeks before  
12 that. And I've often said, I guess sarcastically, but  
13 it's true -- the only surprise I would have found in  
14 this was if Philadelphia hadn't cheated in this  
15 election, because for the last 60 years, they've  
16 cheated in just about every single election.

17       You could say the same thing about Detroit. Each  
18 one of these cities are cities that are controlled by  
19 Democrats. Which means that they can get away with  
20 anything they want to do. It means they have a certain  
21 degree of control over -- certainly control the  
22 Election Board completely and they control law  
23 enforcement. And unfortunately, they have some  
24 friendly judges that will issue ridiculously irrational  
25 opinions just to come out in their favor.

1           So, let's start with the specifics. Pennsylvania:  
2 In Pennsylvania, the margin of victory now for Biden,  
3 which is a -- not a victory -- it's fraud -- is 69,140  
4 votes. The reality is that we are now at a count of  
5 618,770 ballots, for which have we have affidavits that  
6 there was no inspection of that ballot at the time that  
7 it was entered in the vote.

8           If it was a mail ballot -- mail ballots are  
9 particularly prone to fraud -- we were warned about  
10 that by Jimmy Carter -- President Jimmy Carter and  
11 Secretary Baker, in a report about a dozen years ago,  
12 in which they said that mail balloting is particularly  
13 susceptible of fraud, that we should very carefully  
14 consider ever doing it, and that it can be taken  
15 advantage of. Justice Souter warned us of the same  
16 thing, in a comment in an election law case. And even  
17 the New York Times wrote articles about how dangerous  
18 mail-in voting was. And this is the first time we ever  
19 did it en masse and I think we proved that all three  
20 are prophets.

21           It's not only susceptible to fraud, it is easily  
22 susceptible to fraud, particularly if you have a plan  
23 or scheme which sounds eerily similar to what Joe Biden  
24 told us before the election -- that he had the best  
25 voter fraud team in the world. Well, they were good.

1 I don't know that they were that good because they made  
2 significant mistakes, like all crooks do, and we caught  
3 them. One of them was pushing out Republican  
4 inspectors.

5 Every state -- almost every civilized  
6 country -- even Tanzania and places where you wouldn't  
7 think of, have rules about inspectors, particularly for  
8 the mail-in ballots. And why particularly for mail-in  
9 ballots? Because they can more easily be defrauded,  
10 and you can't check on it.

11 People who have never done a mail-in ballot, I'm  
12 going to show you why it's so easy. Well, you fill out  
13 an envelope like this. You put your -- usually in New  
14 York it would be your assembly district and the  
15 precinct in which you're voting. You fill out your  
16 name and address and you sign it. You then use an  
17 inner envelope and you put the ballot inside the inner  
18 envelope. You seal it off and you send it in. When  
19 it's being counted, almost invariably in the in United  
20 States, up until the mass cheating that went on in this  
21 election, a Republican and a Democrat inspector, as  
22 well as others if there are other parties, is allowed  
23 to watch the unsealing of this ballot. Used to go on  
24 all over America when we conducted honest elections  
25 because the only time you can ever find out if it's a

1 fraudulent ballot is when it is looked at. The minute  
2 you approve this, you just throw it away -- gone for  
3 eternity -- the only thing left is the vote. That  
4 could have been Micky Mouse. That could have been a  
5 dead person. That could have been not filled out  
6 properly. That could have been the same person 30  
7 times. All these things have happened, by the way. That  
8 could have been nothing filled out. We'd never know.

9       So, for example, the recount being done in Georgia  
10 will tell us nothing because these fraudulent ballots  
11 will just be counted again, because they wouldn't  
12 supply the signatures to match the ballots. So, it  
13 means nothing to have counted these ballots because,  
14 for example, in Pennsylvania, where we have probably  
15 our most precise evidence, 682,770 of these ballots  
16 were cast, put in and they weren't inspected, which  
17 renders them marked. They weren't inspected, which  
18 renders them ballots that are null and void -- cannot  
19 be counted, have to be removed from the vote. Why? For  
20 several reasons, not the least of which is, that was  
21 basically only one of two places in the state where it  
22 was done. So, in the other parts of the state there  
23 was a legitimate inspection of the ballots. So, if you  
24 have two different standards in different parts of the  
25 state -- one favoring one part of the state, the other

1 disfavoring the other part of the state, that's classic  
2 violation of the Equal Protection Clause of the United  
3 States Constitution, Bush v. Gore being the most recent  
4 case that teaches that.

5       That's not the only fraud that went on in  
6 Pennsylvania. All of the other frauds carried out in  
7 the other states by the Democrat bosses happened there  
8 as well. For example, if you made a mistake in that  
9 ballot and you lived in Philadelphia or in Pittsburgh,  
10 you were allowed to fix the mistake. But if you lived  
11 in the -- what would be considered more  
12 Republican -- more Trump part of the state -- you were  
13 given no such right.

14       One of our plaintiffs, Mr. Henry, cast an absentee  
15 ballot and he failed to put it in the secure envelope  
16 inside -- just put it in open, naked. That ballot was  
17 cast aside because it was invalid, because that breaks  
18 the privacy of the vote. In Pittsburgh and in  
19 Philadelphia, if they noticed that there wasn't an  
20 inner envelope, they'd contact the voter and allow them  
21 to vote again or if he didn't fill it out completely,  
22 or if he made a mistake and didn't sign his full name,  
23 he was allowed to cure it. There is no such provision  
24 under the law in Pennsylvania the Democrat Secretary of  
25 State made that up in order to maximize the votes in

1 Philadelphia and Pittsburgh and to minimize the votes  
2 in the other parts of the state. Clearly illegal,  
3 clearly voter fraud, easily provable, hundreds of  
4 witnesses, maybe thousands.

5 We have -- to give you another example -- we have  
6 17,000 provisional ballots cast in Pittsburgh. Do you  
7 know what a provisional ballot is? A provisional  
8 ballot usually happens this way -- about 15,000 of the  
9 17,000 happened this way. You walk in and say, "I'm  
10 here to vote today."

11

12 "Oh, Mr. Giuliani, you already voted."

13

14 "I did? I don't remember voting."

15

16 "Oh yes, yes. You cast an absentee ballot."

17

18 "No, I didn't?"

19

20 "Yes, you did."

21

22 Why does that happen 17,000 times in Pittsburgh?  
23 People walked in thinking -- actually 15,000 to be  
24 precise -- why did it happen 15,000 times that people  
25 in Pittsburgh walked in to vote and they had already

1 voted according to the Democrat election machine? Did  
2 they forget -- that many people with bad memories in  
3 Pittsburgh? Or is the following correct, that as  
4 witnesses will testify, they were instructed by the  
5 Democrat bosses, when they had a ballot in which there  
6 was no one registered, just assign it to somebody.  
7 Just assign it to Rudy Giuliani, so when Rudy  
8 Giuliani -- maybe Rudy Giuliani won't show up to vote.  
9 And if he does show up to vote, we'll give him a  
10 provisional ballot.

11 That is what we call circumstantial evidence of  
12 the fraud. The direct evidence of the fraud are people  
13 who testified that, in fact, that's what happened to  
14 them, as well as 50 to 60 witnesses we have for the way  
15 they were treated and not allowed to inspect the  
16 ballots. They aren't just not allowed to do it, they  
17 were pushed. In a few cases they were assaulted. In  
18 all cases they were put in a corral, so far away,  
19 probably the closest they got is from here to the back  
20 of that room. We could do like a -- did you all watch  
21 *My Cousin Vinny*? It's one of my favorite law movies,  
22 because he comes from Brooklyn. And when the nice lady  
23 said she saw, and then he says to her, "How many  
24 fingers have I got up?" And she says, "Three." Well,  
25 she was too far away to see it was only two. These

1 people were further away than My Cousin Vinny was from  
2 the witness. They couldn't see a thing.

3 Now, I don't know, are you going to tell me that  
4 sixty people are lying? They didn't just tell me this.  
5 They swore under penalty of perjury, which is something  
6 no Democrat's ever done. You don't even ask Biden  
7 about this. You don't put him under penalty of  
8 perjury. He doesn't even get asked questions about it  
9 He doesn't get asked questions about all the evidence  
10 of the crimes that he committed. These people are  
11 under penalty of perjury. Their names are on an  
12 affidavit. They swear that they weren't allowed to  
13 carry out their function as expected.

14 And it's not just a technical thing -- there's a  
15 reason they did it. Why would you not allow people to  
16 carry out the function they've been allowed to do for  
17 50 years, 60 years? Why wouldn't you allow inspections  
18 of those ballots? Because you knew you were going to  
19 use those ballots to catch Biden up, and you had a big  
20 road ahead of you. You had to catch him up for 700,000  
21 to 800,000 votes that he was behind, and the only way  
22 you were going to do it is with the mail-in ballots.  
23 You couldn't have a Democrat and Republican inspector  
24 around. They don't even have Democrats watching them,

1 because they'd be afraid that they'd be honest  
2 Democrats who would say "You're cheating."

3       So that takes us to Michigan, where there was an  
4 honest Democrat who said they were cheating. Let me  
5 show you her affidavit, because I know you keep  
6 reporting falsely that we have no evidence, that we  
7 have no specific acts of fraud. That's because the  
8 coverage of this has been almost as dishonest as the  
9 scheme itself. The people are entitled to know this.  
10 You don't have the right to keep it from them. You  
11 don't have a right to lie to about it. They are. You  
12 don't report to them that a citizen of this country,  
13 very fine woman, who is willing to allow me to give you  
14 her name -- I can't give you all these affidavits  
15 because if I do these people will be harassed, they'll  
16 be threatened, they may lose their job, they will lose  
17 their friends. We've lost lawyers in this case because  
18 they've been threatened. We've had lawyers that need  
19 protection. What's going in this country is horrible,  
20 and the censorship that you're imposing is making it  
21 worse.

22       But Jessie Jacob is an adult citizen of the state  
23 of Michigan. She's been an employee of the city of  
24 Detroit for Decades. I know her age, but she can tell  
25 you her age. She was assigned to voting duties in

1 September, and she was trained by the city of Detroit  
2 in the State of Michigan. She was basically trained to  
3 cheat. She says, I was instructed by my supervisor to  
4 adjust the mailing date of these absentee ballot  
5 packages to be dated earlier than when they were  
6 actually sent in. The supervisor made that  
7 announcement for all workers to engage in that  
8 fraudulent practice.

9 That's not me saying that, that's this American  
10 citizen saying that, under oath. I don't know, maybe  
11 you could say she's lying, but you can't say there's no  
12 evidence. This is what we call evidence. This is  
13 direct evidence, not circumstantial. I've tried many,  
14 many cases as have my colleagues here. You put a  
15 witness on a witness stand, the witness is testifying  
16 to their own knowledge. This witness goes on the  
17 witness stand and she will say, "I was told to adjust  
18 the date on the absentee ballots. I witnessed election  
19 workers and employees going over to the voting booths  
20 with voters in order to watch them vote and coach them  
21 for whom to vote." Completely. She will testify to  
22 that. I don't know. Biden's people can cross-examine  
23 her, but you can't just throw it away. "Gee, there's  
24 no evidence." Next time you say that you'll be lying  
25 because there is evidence.

1           By the way, this is public. You can all get it.  
2   Its attached to the complaint in Constantino v. The  
3   City of Detroit. Then, she was instructed by a  
4   supervisor not to ask for a driver's license or any  
5   photo ID when a person was trying to vote. Don't ask  
6   for an identification. Why would you not ask for  
7   identification? Because you knew that a lot of people  
8   not entitled to vote are going to come in and early  
9   vote -- because you knew that illegal immigrants were  
10  going to be allowed to vote. You knew if you lived in  
11  Philadelphia, unless you're stuned, that's an Italian  
12  expression for stupid, unless you were stupid, you knew  
13  that a lot of people were coming over from Camden to  
14  vote. They do every year -- happens all the time in  
15  Philly. It's about as frequent as getting beaten up at  
16  a Philadelphia Eagle football game. Happens all the  
17  time -- all the time. And it is allowed to happen  
18  because it is a Democrat, corrupt city and has been for  
19  years, many, many years.

20           And they are carried it out in places they could  
21  get away with it. They didn't carry it out in neutral  
22  places. They didn't carry it out in Republican places.  
23  They didn't carry it out where the law is respected.  
24  They carried it out in a corrupt city where the

1 District Attorney releases criminals en masse, which is  
2 why it has so much crime.

3 She also said, "I observed a large number of  
4 people who came to the satellite location to vote in  
5 person, but they had already applied for and submitted  
6 an absentee ballot." So, she observed a lot people  
7 voting twice. Again, this is Jessie Jacob, not me. I  
8 was instructed not to invalidate any ballots and not to  
9 look for any deficiency in the ballots. Why would you  
10 do that? Because you're cheating -- on  
11 purpose -- cheating. Intentionally cheating. You're  
12 cheating as an institution. This is an instruction  
13 from the Election Commission, or the employer to the  
14 worker. Don't look for any deficiencies in the  
15 ballots. "I was instructed not to look at any of the  
16 of the signatures on the absentee ballots." If she was  
17 instructed not to look for any of the signatures on the  
18 absentee ballots, why the heck do you sign it in the  
19 first place? In order to identify it. She was  
20 instructed not to do that because many of the absentee  
21 ballots were fraudulent and they knew that. And they  
22 didn't want to have a count of that.

23 "On November 4, 2020, I was instructed to  
24 improperly pre-date the absentee ballots when the  
25 receipt date was actually was after November 3rd,

1 2020." Now this is really significant because Justice  
2 Alito of the Supreme Court instructed Pennsylvania that  
3 any ballot that comes in after 8:00 o'clock on  
4 November 3rd 2020, had to be put aside and not only  
5 because it's a question as to its legality and its  
6 constitutionality. What she's telling you is that they  
7 blatantly disregarded that order, that they took  
8 ballots that were marked the 4th and the 5th and the  
9 6th, and they marked it down for the 3rd in blatant  
10 disregard of the order of the United States Supreme  
11 Court.

12 This is -- I don't know if she's a Democrat or a  
13 Republican, I assume if she's working for the City of  
14 Detroit that she's a Democrat. I assume, but I may be  
15 wrong. She's a citizen. I have never met her -- never  
16 coached her. And I'd like you to know that it's signed  
17 under penalty of perjury. We have a hundred more of  
18 these. I can't show them to you because those people  
19 don't want to be harassed. They don't want to have  
20 their lives torn apart by the goons on the other side.  
21 We don't do that to them. They've done that to a lot  
22 of our people. They've done it for four years. And  
23 it's outrageous that it's tolerated. And it's  
24 tolerated because you condone it in the press. You  
25 don't cover it. You don't condemn it. And it

1 shouldn't happen to a Republican, or a Democrat. A  
2 lawyer shouldn't have to withdraw from a case because  
3 he's representing the President of the United States.

4       There are many more affidavits here. I'd like to  
5 read them all to you, but I don't have the time. You  
6 should have had the time and energy to go look for  
7 them. That's your job like it's my job to defend the  
8 President. And I represent the President. It's your  
9 job to the read these things and not falsely report  
10 that there's no evidence. Do you know how many  
11 affidavits we have in the Michigan case -- 220  
12 affidavits. They're not all public, but eight of them  
13 are. Four affiants here -- those are people who give  
14 affidavits -- who report an incident that under any  
15 other circumstances would have been on the front page  
16 of all of your newspapers if it didn't involve the  
17 hatred that you have -- the irrational, pathological  
18 hatred that you have for the President.

19       What they swear to is that at 4:30 in the morning  
20 a truck pulled up to the Detroit center where they were  
21 counting ballots. People thought it was food, so they  
22 all ran to the truck. It wasn't food. It was  
23 thousands and thousands of ballots. And the ballots  
24 were in garbage cans. They were in paper bags. They  
25 were in cardboard boxes, and they were taken into the

1 center. They put out a number of tables. At that  
2 time, they thought all the Republican inspectors had  
3 left. All but two had. And an employee of Dominion,  
4 who we will address a little bit later -- Dominion.  
5 And here's what they jointly swear to: That every  
6 ballot that they could see everything they could  
7 hear -- these were ballots for Biden. When they saw a  
8 ballot, these were ballots only for Biden, meaning  
9 there was no down ticket, just Biden. Many of them  
10 didn't have anything on the outer envelope because  
11 these ballots were produced very quickly, very swiftly,  
12 and they're estimated to be minimum of 60,000 maximum  
13 of 100,000. Many of them were triple-counted which  
14 means they were put into the counting machine this way  
15 - once, twice, three, times.

16 I didn't see that. I don't know that but for the  
17 fact that three American citizens are willing to swear  
18 to it. And we're not going to let them go to court and  
19 do that? We're going to let this election go by, and  
20 when there are, in this case, 60 witnesses that can  
21 prove what I'm saying to you and other acts of fraud in  
22 Michigan? And what's happened to this country if we're  
23 going to let that happen? What's happened to this  
24 country if we're going to cover that up? We let Al

1 Gore carry on an election dispute longer than this one  
2 has been going on for one state and for chads.

3         This happened in Pennsylvania, it happened in  
4 Michigan. Michigan, probably right now if I count up  
5 the affidavits, just one case alone, Trump v. Benson, a  
6 case that we dismissed today because that case was  
7 attempting to get the Wayne County Board of Supervisors  
8 to certify. Well, they didn't; they decertified. That  
9 case has 100 affidavits and the hundred affidavits show  
10 essentially what I've talked to you about -- counting  
11 ballots improperly, counting them three or four times,  
12 having people vote three or four times, changing and  
13 backdating ballots to the point of at least 300,000  
14 illegitimate ballots that we can specifically identify.  
15 The margin in Michigan was is 146,121, and these  
16 ballots were all cast basically in Detroit that Biden  
17 won 80/20. So, you see it changes the result of the  
18 election in Michigan if you take out Wayne County, so  
19 it's a very significant case. That is being raised in  
20 the case of Constantino v. The City of Detroit, not by  
21 us, by an individual plaintiff. We are helping and  
22 assisting in that case, however. And you can find all  
23 the affidavits that you want filed in that case. You  
24 can find out not just allegations; they're allegations  
25 supported by sworn testimony, which is a lot better

1 than Joe Biden has ever done on anything. He doesn't  
2 answer questions, must mush lest give sworn affidavits.

3       Wisconsin: Wisconsin had a very small  
4 margin -- 20,544 last time I looked. And Wisconsin,  
5 without going into great detail -- very similar plan  
6 with the Republicans shut out in the city of Milwaukee  
7 and also in Madison -- Republicans almost universally  
8 shut out from the absentee process, not allowed to  
9 inspect, not allowed to look at the ballots.

10       We have in Milwaukee and in the state of  
11 Wisconsin a much stricter law. Wisconsin doesn't allow  
12 mail-in ballots. They didn't buy into the big mail-in  
13 ballot situation. Wisconsin, when you look at their  
14 constitution, it almost seems to not like absentee  
15 ballots. They state it's not a right, it's a  
16 privilege. And they have very, very strict procedures.  
17 And the strict procedure says that you can't be given  
18 an absentee ballot, you have to personally apply for  
19 one. It's illegal, basically, to solicit a vote. And  
20 they have actually, many reasons for it. It probably  
21 goes back to their progressive days. When I say  
22 progressive, I mean late nineteenth century, early  
23 twentieth century progressive, when that really meant  
24 progressive, not retrogressive.

1           So, there were 60,000 ballots in Milwaukee County,  
2 and 40,000 ballots in Madison that, as far as we can  
3 tell, and this is why we've ordered, because we have  
4 very good information that numbers are going to come  
5 out about here, that don't have applications. Under  
6 the law of the State of Wisconsin, which has already  
7 decided if there's no application for an absentee  
8 ballot, the absentee ballot is thrown away. This all  
9 happened in two places in Wisconsin. It didn't happen  
10 in northern Wisconsin. It didn't happen in Republican  
11 Wisconsin. It didn't happen in neutral Wisconsin where  
12 there's an equal number of Republicans and Democrats.  
13 It happened in a place where the vote was 75-80% for  
14 the Democrat. You take away any number of those and  
15 that 20,000 lead disappears. In other words, if you  
16 count the lawful votes, Trump won Wisconsin by a good  
17 margin. Indeed, if you count the lawful votes in  
18 Pennsylvania, he won by about 300,000 votes.

19           Also, in the lawsuit filed Wisconsin which is  
20 really a petition because of their procedures, there  
21 were no inspectors provided for the counting of illegal  
22 ballots. There were numerous backdated ballots. We're  
23 just counting them now, run over into the thousands.  
24 And there were many precincts in which there was an  
25 overvote. And let me explain to you what an overvote

1 is, which is something you should have explained to the  
2 American people because it's about the clearest  
3 circumstantial evidence of massive fraud can you have.  
4 An overvote is if 200% of the people who are registered  
5 in the district vote. Think about that: 200% of the  
6 registered voters in the district vote. What does that  
7 mean? That means somebody voted twice. That means  
8 somebody who's not entitled to vote, voted -- an  
9 illegal, a person from another city or state, a person  
10 who's not registered. But what it means is that those  
11 were illegitimate votes. You don't have an overvote of  
12 200 percent or 300 percent. You don't have an overvote  
13 of 100%. Most precincts don't have a 100% turnout. In  
14 fact, classically it's considered to be an overvote if  
15 you go over 80%. Well, in Michigan and Wisconsin we  
16 have overvotes in numerous precincts of a 150% or 200%  
17 and 300%. One of the reasons why the two Republicans  
18 didn't certify, in Wayne, Michigan -- Wayne County,  
19 Michigan -- is because the overvote was so high,  
20 monstrously high, in about two-thirds of the precincts  
21 in the City of Detroit, which means, magically,  
22 two-and-three times the number of registered voters  
23 turned out to vote. In fact, we have precincts in  
24 which two times of the number of people who live there,  
25 including children, voted. It's absurd.

1           The frustration of this is, what I'm describing to  
2 you is massive fraud. It isn't a little teeny one.  
3 It's isn't, you know, a hundred votes switched here or  
4 there. Georgia -- we're about to file a major lawsuit  
5 in Georgia. That will be filed, probably tomorrow. I  
6 don't need to go through it -- virtually the same  
7 things I told you before. In the City of Atlanta, the  
8 Republicans were not allowed to watch the absentee  
9 mail-in ballot process. Inspections were completely  
10 cast aside. And we have numerous double-voters. We  
11 have numerous out-of-state voters. And we have  
12 specific evidence of intimidation and changes of vote.  
13 That will all be in the lawsuit that comes out  
14 tomorrow.

15           Arizona is a state that we're looking at very,  
16 very carefully. I would say we're probably going to  
17 bring a lawsuit in Arizona -- more than probably. I  
18 think we are going to bring a lawsuit in Arizona; we're  
19 still collecting that evidence. And the state that  
20 we're looking at that would surprise you is, we have  
21 very, very significant amount of fraud allegations in  
22 the state of New Mexico, which -- and we have a  
23 significant number of allegations in the state of  
24 Virginia. We don't know yet whether the number in

1 Virginia will reach a number that can turn the  
2 election.

3       The states that we have indicated in -- Georgia  
4 Pennsylvania, Michigan, Wisconsin, Nevada, and Arizona,  
5 we have more than double the number of votes needed to  
6 overturn the election, in terms of provable illegal  
7 ballots. All you got to do to find out if I'm  
8 misleading you at all is to look at the lawsuits. Look  
9 at what's alleged. Look at the affidavits. Maybe we  
10 can supply more affidavits. In order to do it I need  
11 to get permission from the people, but in the materials  
12 I have here there are at least ten that come from  
13 citizens. We have a thousand, at least. And we're  
14 getting more every day, and there are other aspects of  
15 this fraud that at this point I really can't reveal.  
16 This is really enough. It's enough to overturn any  
17 election. It's disgrace what happened.

18       And I'll conclude by asking you to just think  
19 about this for a minute: What happened on the morning  
20 of November 3rd when they were going to count this new  
21 kind of ballot -- this mail-in ballot? Did every  
22 Democrat leader in Pennsylvania and in Michigan and in  
23 Wisconsin and in Georgia and in Nevada and in  
24 Arizona -- did they all wake up and all separately have  
25 the same idea? Did they all separately have the idea

1 that we are going to put Republican inspectors in  
2 pens -- we're not going to let them look at mail-in or  
3 absentee ballots? Did they all independently come up  
4 with that, just by coincidence? Hey, we're going to  
5 put the Republicans in pens and corrals -- we're going  
6 to do it in Pittsburgh; we're going to do it in  
7 Philadelphia; we're going to do it in Detroit; we're  
8 going to do it in Milwaukee; we're going to do it in  
9 Las Vegas; we're going to do it in Phoenix; we're going  
10 to do it in Atlanta -- or, is it the logical conclusion  
11 that I think any jury would accept as they heard this  
12 evidence that somebody had this plan? Maybe that was  
13 always the plan -- to do this very, very questionable  
14 form of voting which has been criticized by President  
15 Carter, by Secretary Baker, by most experts on election  
16 reform. I think the logical conclusion is this is a  
17 common plan and a common scheme that comes right  
18 directly from the Democrat Party and it comes from the  
19 candidate. Clearly. That's the reason why Hillary  
20 Clinton said, "Don't concede if even if you're losing."  
21 That's the reason we had a Freudian slip by the  
22 candidate when he said he had the best voter fraud team  
23 in the country. That's the reason why he probably  
24 didn't have to go out and campaign. He had to have  
25 known what they were going to do. This had a to be

1 planned in advance. I'm kind of checking, did they go,  
2 you know, to the same contractor to get the corrals to  
3 put the republicans in.

4 This is a disgraceful thing that was done in this  
5 country, probably not much more disgraceful than the  
6 things these people did in office, which you didn't and  
7 don't bother to cover and you conceal from the American  
8 people. But we let this happen. You know, we use  
9 largely the Venezuelan voting machine, in essence, to  
10 count our vote. We let this happen, we're going to be  
11 become Venezuela. We cannot let this happen to us. We  
12 cannot allow these crooks, because that's what they  
13 are, to steal an election from the American people.  
14 They elected Donald Trump. They didn't elect Joe  
15 Biden. Joe Biden is in the lead because of the  
16 fraudulent ballots, the illegal ballots, that were  
17 produced and that were allowed to be used after the  
18 election was over. Give us an opportunity to prove it  
19 in court and we will.

20 Now I'm going to ask. Sidney Powell to describe  
21 to you what we can describe about another totally  
22 outrageous situation. I don't think most Americans  
23 know that our ballots get calculated -- many of  
24 them -- outside of the United States and are completely  
25 open to hacking -- completely open to change -- and

1 it's being done by a company that specializes in voter  
2 fraud. I'll let Sidney describe that to you.

3

4 **SIDNEY POWELL:** Thank you, Rudy. What we are really  
5 dealing with here and uncovering more by the day is the  
6 massive influence of communist money through Venezuela,  
7 Cuba, and likely China in the interference with our  
8 elections here in the United States. The Dominion  
9 voting systems, the Smartmatic technology software and  
10 the software that goes in other computerized voting  
11 systems here as well, not just Dominion, were created  
12 in Venezuela, at the direction of Hugo Chavez, to make  
13 sure he never lost an election after one constitutional  
14 referendum came out the way he did not want to come  
15 out.

16 We have one very strong witness who has explained  
17 how it all works. His affidavit is attached to the  
18 pleadings of Lin Wood in the lawsuit he filed in  
19 Georgia. It is a stunning, detailed affidavit because  
20 he was with Hugo Chavez while he was being briefed on  
21 how it works. He was with Hugo Chavez when he saw it  
22 operate to make sure the election came out his way,  
23 that was the express purpose for creating this  
24 software. He has seen it operate, and as soon as he  
25 saw the multiple states shut down the voting at on the

1 night of the election, he knew the same thing was  
2 happening here, that was what had gone on.

3         Now the software itself was created with so many  
4 variables and so many back doors that can be hooked up  
5 to the internet, or thumb drive stuck in it, or  
6 whatever, but one of its most characteristic features  
7 is its ability to flip votes. It can set and run an  
8 algorithm that probably ran all over the country to  
9 take a certain percentage of votes from President Trump  
10 and flip them to President Biden, which we might never  
11 have uncovered had the votes for President Trump have  
12 been so overwhelming in so many of these states, that  
13 it broke the algorithm that had been plugged into the  
14 system, and that's what caused them to have to shut  
15 down in the states they shut down in. That's when they  
16 came in the back door with all the mail-in ballots,  
17 many of which they'd actually fabricated. Some were on  
18 pristine paper with identically matching, perfect  
19 circle dots for Mr. Biden. Others were shoved in in  
20 batches -- they're always put in in a certain number of  
21 batches, and people would rerun the same batch. This  
22 corresponds to our statistical evidence that shows  
23 incredible spikes in the vote counts at particular  
24 times and that corresponds to eyewitness testimony of

1 numerous people who have come forward and said they saw  
2 the ballots come in the back door at that time.

3 Notably, the Dominion executives are nowhere to be  
4 found, now. They're moving their offices overnight to  
5 different places. Their office in Toronto was shared  
6 with one of the Soros Entities. One of the leaders of  
7 the Dominion project overall is Gordon Malloch-Brown,  
8 Mr. Soros' number-two person in the UK and part of his  
9 organization. There are ties of the Dominion  
10 Leadership to the Clinton Foundation and to other known  
11 politicians in this country. Just to give you a brief  
12 description of how this worked, I'm going to quote from  
13 a letter that was written, and I will read that to make  
14 sure I get the quotes right. This person was objecting  
15 to the United States acquisition of is he Sequoia  
16 Voting Systems by Smartmatic, a foreign owned company:  
17

18 "I believe this transaction raises exactly the  
19 sort of foreign ownership issues that Cepheus is  
20 best positioned to examine for national security  
21 purposes. It's undisputed that Smartmatic is  
22 foreign-owned and that it has acquired Sequoia."  
23

24 They keep changing the names as they go along.

25 Different times, when a problem comes up you can just

1 create a different corporation and call it a different  
2 name, but it was a voting machine company doing business  
3 in the United States.

4 "Sequoia voting machines were used to record over  
5 125,000,000 votes during the 2004 Presidential  
6 election in the United States. Smartmatic, now  
7 acknowledges that Antonio Mugica, a Venezuelan  
8 businessman, has controlling interest in  
9 Smartmatic, but the company has not revealed who  
10 all the Smartmatic owners are. According to the  
11 press, Smartmatic's owners are hidden through a  
12 web of offshore private entities, and that is, in  
13 fact true. Smartmatic has been associated with  
14 the Venezuelan government led by Hugo Chavez,  
15 which is openly hostile to the United States."

16 and of course as we all know communistic and really  
17 brutalizing its own people.

18 "The system has been continued there by  
19 Mr. Maduro; it insured his election. Smartmatic's  
20 possible connection to the Venezuelan government  
21 posits a potential national security concern in  
22 the context of its acquisition of Sequoia because  
23 electronic voting machines are susceptible to  
24 tampering and insiders are in the best position to

1           engage in such tampering. This letter expresses  
2           the concern of the Chicago 2006 primary election.

3   And it ends by saying,

4           "The products and services that are of Venezuelan  
5           origin and evaluates Smartmatic's ownership to  
6           determine who could have influence and control  
7           over these and other Sequoia products and services  
8           are important to the national security of the  
9           United States."

10          This letter was written to Hank Paulson on  
11       October 6, 2006 by Congresswoman Carolyn B. Maloney.  
12       Senators Klobuchar and Warren have raised these  
13       concerns as recently as December 2019. Why our  
14       government has not taken them seriously is beyond my  
15       comprehension unless some of the three-letter agencies  
16       have used them themselves in other parts of the world.  
17       We know that the technology was exported to affect an  
18       election in Argentina. That's admitted by our friend  
19       who wrote the affidavit about Hugo Chavez and his  
20       interest in Smartmatic. Again, in 2006, Carolyn  
21       Maloney wrote the Honorable John Snow, the Secretary of  
22       the Treasury about the issues.

23          Speaking of Smartmatic's leadership, one of  
24       Smartmatic's patent holders -- Eric Coomer, I believe  
25       his name is -- is on the web as being recorded in a

1 conversation with Antifa members saying that he had the  
2 election rigged for Mr. Biden, nothing to worry about  
3 here. And he was going to -- they were going to  
4 "F- Trump." His social media is filled with hatred for  
5 the President and For the United States of America as a  
6 whole, as are the social media accounts of many other  
7 Smartmatic people.

8       There has been widespread use of this. Dominion  
9 itself is utilized in 2,000 jurisdictions in 30 states.  
10 It has been uncertifiable in multiple states who  
11 realized all of the problems that it has including  
12 Texas. Experts have described it across the board from  
13 a Princeton group of three professors to experts that  
14 we've talked to about its end user vulnerabilities.  
15 People can admittedly go in and change whatever they  
16 want. They can set the ratio of votes from one thing  
17 to another. They can say that a Biden vote counts as  
18 1.25 and a Trump vote counts .75, and those may be the  
19 numbers that were actually used here.

20       It's not just the swing states that were affected.  
21 The algorithm was likely run across the country to  
22 affect the entire election. Like I said, we only  
23 discovered it this year because of the overwhelming  
24 number of votes for President Trump in the swing states  
25 that caused machines to have to shut down for them to

1 backfill for adding votes. We have evidence of  
2 different numbers of votes being injected into the  
3 system, the same, identical, unique six-digit number  
4 multiple times in at least two states that we've  
5 analyzed so far, and I'm talking about 341,542 votes  
6 for Biden and 100,012 for Trump. There's no  
7 explanation, no logical explanation for the same  
8 numbers being injected 20 minutes apart into the  
9 machine.

10 The software manual itself, you can download it  
11 from the internet, and I would encourage you all to  
12 read it because it specifically advertises some of  
13 these things as features of system. Why it was ever  
14 allowed into this country is beyond my comprehension  
15 and why nobody has dealt with it as absolutely  
16 appalling. The machines were easily accessible to  
17 hackers. There's video on the net that will explain to  
18 you how a kid with a cell phone can hack one of these  
19 voting machines.

20 There's been no oversight of Dominion or its  
21 software. Workers in each county were trained by  
22 Dominion, but there's no evidence of any monitoring  
23 otherwise. We have testimony of different workers  
24 admitting that they were trained how to dispose of  
25 Trump votes and add Biden votes. The software has a

1 feature pursuant to which you can drag and drop any  
2 number of batches of votes to the candidate of your  
3 choice or simply throw them away, so we have  
4 mathematical evidence in a number of states of massive  
5 quantities of Trump votes being trashed -- just simply  
6 put in the trash like you would in your computer with  
7 any file, and Biden votes being injected. That's in  
8 addition to the flipping.

9 I mean, it really happens in two ways. There's an  
10 algorithm that runs that automatically flips all of the  
11 votes and then each operator has the ability to go in,  
12 override settings, they can ignore signature, they can  
13 ignore the top line of the ballot, they can go down  
14 ballot and select who they want to change the results  
15 for, The gentleman who founded Smartmatic, there's  
16 video of him on the internet explaining that, yes, on  
17 at least one occasion he admits they changed a million  
18 votes with no problem.

19 Many of the jurisdictions that have had this  
20 problem might not have known of the issues, but many  
21 did. And I think a full-scale criminal investigation  
22 needs to be undertaken immediately by the Department of  
23 Justice and by every State's equivalent Attorney  
24 General's office or state investigatory unit because  
25 there's evidence of different benefits being provided

1 to the people who spent \$100,000,000 of money at the  
2 last minute for their state to get the Dominion voting  
3 systems put in in time for election in different ways.  
4 There's one person that a lawyer told me got election  
5 insurance, meaning that he would be able to make sure  
6 he was elected. I'm sure they explained that feature  
7 in detail to many people who expressed interest in  
8 putting this voting system in.

9 Texas denied certification of the Dominion system  
10 in 2019, but there are, no doubt, issues with the  
11 software that Texas did use unbeknownst to Texas, I  
12 would imagine, since they went to great trouble to  
13 examine the Dominion systems and reject them, but other  
14 software in the source code that does the alterations  
15 is embedded, we've been told, in the source code all  
16 across the country in all the voting machines. There's  
17 no doubt it has been used to alter elections in other  
18 countries. We know specifically that Venezuela  
19 exported it for that purpose to Argentina and other  
20 Latin American countries to make sure that the corrupt  
21 rulers who were willing to pay the highest price for  
22 being in office were allowed to rig their elections.

23 This is stunning, heart-breaking, infuriating, and  
24 the most unpatriotic acts I can even imagine for people  
25 in this country to have participated in, in any way,

1 shape, or form, and I want the American public to know  
2 right now that we will not be intimidated. American  
3 patriots are fed up with the corruption from the local  
4 level to the highest level of our government, and we  
5 are going to take this country back. We're not going  
6 to be intimidated. We're not going to back down. We  
7 are going to clean this mess up now. President Trump  
8 won by a landslide. We're going to prove it, and we're  
9 going to reclaim the United States of America for the  
10 people who vote for freedom.

11

12 **JENNA ELLIS:** My name is Jenna Ellis and I'm a senior  
13 legal advisor to the Trump campaign and I'd like to  
14 just explain now where we've been and where we're at,  
15 and what you can expect from this process.

16 So, what you have heard, I'm sure, in the fake  
17 newspapers tomorrow will be one of two things, either  
18 there was not sufficient evidence that we've presented,  
19 or we spoke too long. Okay, so what you've heard now is  
20 basically an opening statement. This is what you can  
21 expect to see when we get to court to actually have a  
22 full trial on the merits, to actually show this  
23 evidence in court and prove our case. This is not a  
24 Law and Order episode where everything is neatly  
25 wrapped up in 60 minutes.

1           For those of you who are here in this room or have  
2 maybe tuned out in other networks, clearly, you've  
3 never been court reporters. Trials take time. Putting  
4 on evidence takes time. This is basically an opening  
5 statement so the American people can understand what  
6 the networks have been hiding and what they refuse to  
7 cover, because all of your fake news headlines are  
8 dancing around the merits of this case and are trying  
9 to delegitimize what we're doing here.

10           Let me be very clear that our objective is to make  
11 sure to preserve and protect election integrity.  
12 President Trump has been saying from day one that this  
13 is about maintaining free and fair elections in this  
14 country. It is not about overturning an outcome. It  
15 is about making sure that election integrity is  
16 preserved, and every American should want that. If  
17 every American is not onboard with that you have to ask  
18 yourself why. And if your fake news network is not  
19 covering this, or allowing you cover it fairly and  
20 accurately, you should ask yourself why. It is  
21 absolutely a legitimate legal basis.

22           We have been asked to provide an entire case that  
23 generally would take years in civil litigation. I've  
24 been a prosecutor. I have tried cases with far simpler

1 facts. One thing happened in a matter of minutes and  
2 it still takes days. And we go through a jury process.

3 This is the court of public opinion right now. We  
4 are not trying our case in the court of public opinion,  
5 because if we were, we would get unbiased jurors. I  
6 would strike 99% of you from the jury and I would be  
7 allowed to because of the fake news coverage you  
8 provide. You're not unbiased jurors and until you step  
9 out of your role as a journalist and actually go into a  
10 courtroom and you are a judge on a bench that has sworn  
11 an oath to be unbiased in our separation of powers,  
12 then your opinion does not matter. The facts matter;  
13 the truth matters, and if you are fair reporters, you  
14 will cover that fairly and appropriately and you will  
15 allow coverage of our media team and our legal team.

16 That is absolutely shocking that all you cover are  
17 around the margins. And I've seen all of you taking  
18 pictures right now, and I anticipate what your  
19 headlines are going to be. If you are not willing to  
20 talk about the evidence that has been presented, then  
21 that is absolutely unacceptable for journalistic  
22 standards. This is an opening statement. This is  
23 something where we have told you what the evidence will  
24 show. And we have given you a brief description. That  
25 happens in a courtroom all the time where that's not

1 the fact-finding process, that is just an overview.  
2 That is what we have given you today because the  
3 American people deserve to know what we have uncovered  
4 in the last couple of weeks.

5 Remember, this is such a short time frame, and  
6 this is an elite strike force team that is working on  
7 behalf of the President and the campaign to make sure  
8 that our constitution is protected. We are a nation of  
9 rules, not a nation of rulers. There is not someone  
10 that just gets to pick who the next President is  
11 outside of the will of the American people.

12 And that is our task, because when we talk about  
13 voter fraud, it's actually election official fraud.  
14 That cannot stand. The constitution requires that the  
15 state legislatures are the ones that make election law.  
16 It still has to go by the US Constitution, but what has  
17 happened in this case is that state and local level  
18 officials and all the way up, have changed the rules.  
19 That's what the Democrats do if they don't like the  
20 rules -- they change them, and they change them at the  
21 last minute. They manipulate them, they want to tear  
22 down our American system.

23 Our founders were so brilliant that they  
24 anticipated this, that there would be corruption, there  
25 would be foreign influence, there would be attempts to

1 manipulate the outcome of the election, especially with  
2 who they called our Chief Magistrate. I would encourage  
3 you to go home and actually read Alexander Hamilton  
4 Federalist 68 and see what he described as an advocacy  
5 position to adopt and ratify the electoral college and  
6 the process by which we select our President. We  
7 select our President through the electoral college not  
8 because it disenfranchises voters but because it is a  
9 security mechanism for exactly the type of corruption  
10 that we're uncovering. And every American should be  
11 grateful and thankful that our founders had the  
12 foresight to put in those protections and provisions to  
13 make sure that your legitimate, legal vote is not  
14 disenfranchised. That is what we're advocating for.

15       We want to make sure to protect election integrity  
16 and your president -- President Trump -- we are so  
17 proud that he is in this fight, because he understands  
18 that when he swore his oath of office, he swore an oath  
19 to uphold and defend the United States Constitution.  
20 That is what he is doing and that is what we are doing.  
21 We're confident that through this multiple pathways to  
22 victory, we will get to the actual outcome that the  
23 evidence shows. But this is not about overturning an  
24 election on our part, it's about making sure that we

1 protect and preserve free and fair elections for all  
2 future American elections.

3       If the United States caves to corruption or this  
4 type of election integrity disaster, then no election  
5 will be secure from here on out, and we all need to be  
6 keenly aware of that. We are the representatives here  
7 that are standing in this gap and defending President  
8 Trump and defending you, the American people at the end  
9 of the day. This is ultimately about the United States  
10 of America and we want to make sure to protect and  
11 defend that, and as my colleagues have said, we will  
12 not back down. We won't be intimidated. President Trump  
13 will not be intimidated. You, the American people  
14 should not be intimidated.

15       You, the press, should cover this fairly and  
16 should know that this matters to election integrity and  
17 it matters to the future of our nation. So, we've  
18 given you an overview, but recognize this is not a  
19 court of law. We will get there, and we have time, and  
20 we have constitutional provisions that will step in  
21 when we show the corruption and the irredeemably  
22 challenged and overturned votes that are absolutely  
23 corrupt in all of these counties. It is irredeemably  
24 compromised. We will show that, but you have to give  
25 us that opportunity. This has been just our opening

1 statement, and we have an opportunity to get there, and  
2 we have time, and we will do that. This is the United  
3 States of America and we stand proudly for President  
4 Donald J. Trump. Thank you.

5

6 **SIDNEY POWELL:** The world is watching this. I have  
7 gotten multiple emails from people in other countries  
8 who watched the same pattern happen there. We have  
9 witness testimony that the same things were done in  
10 those countries as this was exported from Venezuela and  
11 by Maduro and by Mr. Chavez and by Cuba, and of course  
12 we know China also has a substantial presence in  
13 Venezuela and substantial interest in making sure that  
14 President Trump does not continue in office.

15 This is the consummate foreign interference in our  
16 election, in the most criminal way you possibly  
17 imagine. It must be shut down. We know, for example,  
18 that one of the Dominion's highest level employees, or  
19 officers, went to Detroit himself to man the Detroit  
20 operation center where he could watch the votes coming  
21 in real time and decide what file folder in the system  
22 to put those votes into. That's why you see massive  
23 spikes after hours when people were told that all the  
24 votes were in and all the votes were counted.

1           Many Dominion employees have already reached out  
2 to us to tell us the truth. They are Americans who  
3 want to ensure election integrity like we do. I would  
4 encourage every Dominion or Smartmatic employee who is  
5 fed up with the corruption in this country to come  
6 forward as soon as possible because these are serious  
7 federal offenses that I'm confident the Department of  
8 Justice will be in pursuit of in very short order if  
9 they are not already.
